# Project Management

**Externally-recognized. Job-relevant. Future-ready.**

**Prepare for in-demand jobs by earning a Project Management credentialed certificate from Foundry College.**

**22.2 million** new project management **jobs** are forecast to be added through 2027.

## Earn the CompTIA Project+ certification

### Project Management Foundations

Learn project management basics of how to initiate, plan, and execute a project. You'll identify stakeholders, project costs, timelines, and project risks; and create schedules, communication and quality management plans, and risk analyses. Learn to assemble, develop, and manage a project team to execute a project.

### Project Management in Practice

Learn to monitor, control and close a project. You'll become oriented to project management in practice, integrating your knowledge from the Foundations course and applying the skills to scenarios across industries with projects of varying sizes. You'll be introduced to the agile project management methodology and learn how it often blends with the waterfall methodology in hybrid project management.

## What makes the Foundry College experience unique?

### LIVE INSTRUCTION

Go beyond the lecture and learn alongside your classmates - in real time - with role-playing, breakout groups, and active learning exercises.

### ONLINE SETTING

Classes are conducted entirely in the online classroom, with no pre-work or homework assigned.

### REAL COMMUNITY

Actively engage with your professor and fellow students throughout the class, and work directly with your personal coach and peer mentors.

# FOUNDRY COLLEGE

Foundry College provides the first professional soft skills education that ends in a job credential. Get started today at foundrycollege.org/futureready

# Designed for future-ready adults

## The six-course certificate provides a well-rounded framework for success by including these professional skills courses.

**Managing Yourself at Work**

Learn to organize your work, recognize and manage emotions, develop personal responsibility, and stay motivated.

**Practical Problem Solving**

Learn to frame and solve a wide range of problems in various professional contexts.

**Clear Communication**

Learn to read and write precisely, listen well, communicate clearly in group settings, and interpret visual communications.

**Working with Others**

Learn to collaborate and negotiate effectively, work well in teams, and build professional relationships.

"The student community at Foundry College is great, and I like that Foundry College classes are interactive. I can raise my hand at any time and get immediate answers to questions and support from the professor. And the one-on-one coaching has been very helpful. I feel inspired and motivated."

**Markela, current Foundry College student**

**Top 4**

*Employers say the most in-demand 21st century skills are **oral and written communication, collaboration, and problem solving.***

## Start the simple admissions process today!
